A TAP CUT OFF.

An important order was issued from the Treasury department a few days ago to the Collectors of the ports of New York, Every apparent difficulty is magnified into the side of a real one, and all sorts of objections are made. The reporters are in structed to find all the fault that is possible, Boston, Philadelphia and Baliimore, and perhaps elsewhere. It is an order for bidding the Collectors of those ports from permitting goods to be entered for transmirable features of the law as a revenue measure. The specific principle works like a charm, in despite of the hindrances portation to any of the seceded States The following is the official document re which was taxed so much per pound, and the smount of duties were then easily calculated. the smount of duties were then easily calculated. The insurmountable difficulties predicted by the importer's organs were found not to exist. The result of four days experience under the new law was, on the whole, quite satisfactory. The amount of revenue collected was nearly or quite double what would have been obtained under the late law—not that the rate of duties are doubled, but the evasions and frauds practiced under the act of 1857 are slopped. To the bonest importer the new law will be far more beneficial than the old, as it will protect him against the under competition of those who importer the new law will be far more beneficial than the old, as it will protect him against the under competition of those who importer the new law will be far more beneficial than the old, as it will protect him against the under competition of those who imported the source of the dependent of the practice to reship foreign specially.

the old, as it will protect him against the under competition of those who imported under false involces.

The old Satunto frightened its New York readers, or such of them as were selly enough to credit its statements, with the idea that the new tariff would be imported into New York after the 1st of April, 1861, until the act was repealed. But it spears from its own columns that several shiploads a day of foreign goods are striving and paying the new rates of impost. A year from new and the present clamor against Morrill tariff will have cessed, in New York, and mainly in England. It will be shown that nobody has been seriously hurt, while the industry of the country and the revenues of the Government, have been immensely benefitted.

Proposed Cab Reform in New York.

A law is now before the New York Legislature to incorporate "The Metropolitan Cab Company" of the cities of New York and Brooklyn. Should the bill become a law, it is the intention of the Company to place in the two cities named three kinds of vehicles for the multi-accommodation: The course for for the public accommodation: The coups for the use of ladies; the Hansom for the use of the use of ladies; the framous for the use of business mee, and the four-wheeler, so con-atructed as to carry baggage, for the conveni-ence of the traveling public. The tariff will be the same for all - 30 cents for any distance within a mile, and 15 cents a mile for any ad-ditional distance; for one hour 60 cents. No extra charge for baggage, except for large packages and trunks, which will be charged 10 cents extra for each one for any distance. The system, and it will undoubtedly

The New Loan, A portion of the new stock has already been issued. This result is most creditable to the Department, and constitutes striking evidence of a marked improvement in its atiministra-tion since the 4th of March. Promptoses, de-cision and efficiency have thoroughly sup-olated procrastination, timidity and shiftlesstion since the 4th of March. Promptness de-cision and efficiency have thoroughly sup-planted procrastination, timidity and shiftless-ness. It was a bold and judicious stroke of policy on Mr. Chase's part to refuse to sward more of the loan than was offered to be taken at fair rates. He has administered a rebuke to the combination of bidders, which must show them that they overshot their mark, and he has, by this one set, advanced the public credit and greatly promoted public confidence. He says he expects espitalists to bid for the Government loan as an investment, and not toy with it as fancy stock.

The wisdom of his decision is already vindi-cated by numerous telegraphic dispatches

ted by numerous telegraphic dispate om rejected bidders offering to take the arded stock at higher figures, and it is is hour apparent that any amount of loan awarded stock at higher figures, and it is at this hour apparent that any amount of loan se-curities might now be disposed of at a hand-some advance upon ninety-four. It was time that speculators upon the necessities of the Government ahould receive a rebuck. Of course the Secretary lass no power to accept these telegraphic offers, nor will he re-adver-tise the loan. The presumption is that he will avail himself of his power and issue treasury notes for the balance of the eight millions re-quired.—Wash. Cov. N. Y. Times.

Reported Outrage in Virginia.

[Wash. Cor. N. Y. World.]

The city has been experiencing to-day mong other sensations, one to the effect the great rich had taken place in Virginia, an that a mail agent had been mobbed and farre in fact.

If the small is interfered with by any fladig-nities to the small agent, both will be promptly removed from the road. I am satisfied this course will be pursued.

The Lynchburg Spanblican states that Mr. Bruce, the small agent in question, was waited

side) almost daily. The number of men in position has of late been diminished rather than increased, by the termination of the period of service of a number of volunteer companies. An entire regiment will go out of service in a very short time. It is not a little remarkable that nobody re-enlists, but all go to their homes to stay. The experience of a single term of enlistment is quite amough. In one month longer the forces of South Carolina will, from this cause, become reduced more than one-half.

Having insished the harbor defenses, Gen. Beauregard, seemingly anticipating the presence of a body of Federal tracys, and with the view of providing against emergencies, has commenced planting a mortar battery at Mt. Pleasant. This point is too distant to take part in an attack on Fort Sumter, and therefore this battery must be designed for other uses. When Major A-derson was in Fort Moultrie, and it was proposed to drive him out, a battery on Mount Pleasant was commenced, as that point was supposed to command Moultrie. The inferime therefore is that the Releis are providing against the time the little Wyandotte came steaming out to let us know it was a false slare. If I live a hun-dred years I shall never forget the feelings I had when I was loading my revolvers. We were all busy with our own thoughts, I can assure you, and for about ten minutes hardly anything was heard save the tick, tick, of a Coit, or the dull dud of a rifle ramrod. We did all our little walnables up, and directed

of the winter, and when he left for Washington, in unusually good health. About six
weeks since, however, he took a violent cold,
and owing to the fact of the distracting
crowds for Washington, and the churpwrafted
absence of home comforts, with the added demanda upper his time, occasioned by office

seekers and other visitors, he doubtlets neglected his health to a degree with him unman. He was, however, able to be upon the
bench, with the exception of a few mass illiness, during the entire winter assistion of the
Suprame Court.
He returned to Cincinnati on the 22d ult.,
suffering from a sewere cough, but went about
actively, and seemed in usual sprints. On the
morning of Wednesday, 3d lust, his physician
was sent for at an early hour—as the Judge
was suffering mass from pulmonary in the

What influences have led to the displacement of Capt. Hall we are not aware. It is well known that he had not the least ray possibility for the stupid misminagement of the ship's affairs during her day in this city though we think it not at all unlikely that he had been made the scape goat for the above of these. ing, the inquisition came down upon them. It must be admitted that, if the Holy Office had reserved all its terrors for such asse, it would not now have been remembered as the most hateful judicature that was ever known, among civilized men. The subattern impostors were thrown into dungeons. But the chief criminal continued to be master of the king and of the kingdom.

Meanwhile, in the distempered mind of Charles, one mania succeeded another. A longing to pry into those mysteries of the grave from which human beings avert their floughts, had long been hereditary in his house. Junan, from whom the mental constitution of her posterity seems to have derived a morbid taste, had sat, year siter year, by the bed on which lay the ghastly remains of her unshand, appareled in the rich embroidery and fewels which he had been wont to wear while living. Her son Charles found an eccesaric pleasure in celebrating his own obsequies, OFFICES: RNER SEVENTH AND P STREETS, directly op-posite the Patent Office, Washington, D. WASHINGTON, April 5.

THE COMING COLLISION. stances.

Much alarm exists here on account of the military preparations of the Government, which preserves entire silence.

Lieut Gilman had an interview this afternoon with Secretary Cameron and General The Cabinet and best informed parties here now consider a collision between the Federal Sovernment and the Southern rebels inevitable.

A member of Congress from your State, who has spoken to the President within the last twenty-four hours on the subject, told me to-day that blood would be spilled in less than ten days. A POLICY ARRIVED AT, AT LAST. officer of South Carolina has also arrived to recruit for the Southern army.
Government is still without intelligence whether the reinforcement of Fort Pickens had been effected, and is naturally very anxious, as orders were sent weeks ago.
A dispatch from Baltimore states that a targe body of volunteers left that city to raily around the flag of the Union in Texas, under Houston.

A FOLICY ARRIVED AT, AT LAST.

I feel authorized in stating that the present naval and army movements mean nothing less than the protection of the Southern forts from the attacks of the r-bel army, and the collection of the revenue from on shipboard.

A RHALIZING SENSE OF THE PERILS OF DONORMAISM.

Both the Executive and members of the Cabinet have fully realized the fact that the continuation of the present condition of affairs cannot but result in not only a bankrup. Treasury, but an utter breaking up of the Government and demoralization of the nation, and hence have determined to fulfill the promises and redeem the pledges of the Inaugural. large body of volunteers left that city to rally around the flag of the Union in Texas, under Houston.

Washington correspondents assert that the President is daily receiving numerous telegraphic dispatches from all parts of the control, urging no surrender of any forts, and offering volunteer attempts of reinforcement. One man offered to reinforce Sumter at tendays notice for five thousand dollars.

Gov. Curtin, of Pennsylvania, had a long interview with Gen. Scott and Secretary Cameron. It is rumored that Pennsylvania will immediately assume a war footing.

New Youx, April 6.—Government has chartered the steamer Illinois, which will got osea under scaled orders to-day or Monday. Her mails and passengers for Europe go in the City of Baltimore.

The Pribanc's Washington correspondent says no official intelligence has been received that Major Anderson's supplies have been stopped—that the Spanish government is not responsible for the demonstration at St. Domingo; also, that no orders have been issued for the blockade of Southern ports. Com. Stringham's cammission has a different object.

The Times Washington correspondent says promises and redeem the pledges of the inaugural.

AN ENUPTION OF EFISTOLARY INDIGNATION.

A shower of telegraphic and epistolary exhortations not to give up Fort Sunter, has fallen upon the President since the recent symptoms of an impending attack of Major Anderson by the revolutionary forces. Prominent men from all sections of the country offer to volunteer in undertaking a reinforcement.

A CINCINNATI AMERICAN MANUS KNOWN THAT HIS VOICE IS STILL FOR WAR. His voice is still for war.

A well known American leader of your city telegraphed to Gurley last night to tell the President not to budge an inch—that to yield anything was to yield everything, and that a million of Northern men would respond to a call for the maintainace of the Federal authority at the first attack on Southern forts. The dispatch was handed to the President, at a regular Cabinst meeting held this afternoon, by Postmaster General Brown.

EFFECTS OF WESTERN REMONSTRANCE. EFFECTS OF WESTERN REMONSTRANCE.
Letters from the West say that the demorshization arising from the fact of a continued upunsheld defiance of the Federal authorities, contributed largely to the defeat of the Republicans in their late municipal elections. Their remonstrances doubtless did a good deal towards apurring the Executive to the present exhibition of greater vigor.

Lieut. Talbot, who left Sumter yestsrday, as bearer of dispatches from Major Anderson, will not return to Fort. Sunter. His health precludes him from active duty, and a position has been tendered him in the War Department here. Lieut. Talbot will reach here tomorrow.

The War Department has no information to the effect that Gov. Rencher has made a revolution in New Mexico for selzing Fort Marcy. The runtor is doubted.

SECESSION DEFEATED IN VIRGINIA.

SECESSION DEFEATED IN VIRGINIA. SECESSION DEFEATED IN VIRGINIA.

The news from Virginia is glorious. Secession yesterday received a fearful blow. The Union men are triumphant, and very hopefu that all their opponents efforts are deadened so far as they aim to lead to the secession of the State. Salutes have been fired in different parts of the State.

THE ARMSTRONG COURT MARTIAL.
Lieut. Gilman, just from Fort Pickens, has
testified before the Court Martial in the case
of Com. Armstrong's surrender of the Pensacola Navy Yard, concluding all ble evidence,
The arguments will be heard to-morrow.
Lieut, fillman's testimony was very important,
as he was personally present, and, with Lieut.
Stemmer, was a party to the several interviews had with Com. Armstrong, before and
about the time of his giving up the Warrington Navy Yard to the Fiorida and Alabama
troops. troops.

He states that Lieutemant Slemmer himself had been promised by Commodore Armstro g certain facilities for removing arms, ammuniton, provisions, &c., at an appointed hour, from Barraneas Barracks, where the artillery were stationed, to Fort Picke s, for security; but Commodore Armstrong falled to redeem his offer, and being confronted with the fact, did not deny it.

Communitiented.

Relitors Daily Tribnes;

Can you give the public any information about the improvements now going on in the Court House yard? That place has been improved so often, and all to no purpose, that it is, time something practical and lasting abould be undertaken. I notice that holes are being dug in straight rows along the fonces, and eridently trees are intended to be planted in them. Now, if it is a gardener who is doing this, all I have to say it this, has he should understand he business better. No skillful landscape gardener would plant out trees in limitation of fence posts. That hobby for regularity has exploded long ago. A lew trees scattered here and there, in groups, under the practical eye of a competent landscape gardener, would give more beauty and effect to the Coart House yard than any number of trees you could plant out in rows, postato-patch fashion. I do not know the party or parties who have the improvements in charge, and do not write to censure say one, but merely ask for information.

The Water Question.

We directly on its receipt put under lock and key, until such time as we could take it up as we wished, the late Report of the Board of Water Commissioners, enriched as it is by a Special Report of Chief Engineer Chesbrough on topics of interest to all our citizens, and of annually increasing vital importance to our city. Water will, for many years to come, continue to be useful for very many purposes other than Navigation, and being a good thing, it is emphatically one of those you cannot have too much of. Do not call us a Hydropathist, nor deem us unmindful of death by drowning. There are two great divisions in this highly interesting Report the which let us take up separately. And, first, QUANTIT.

From the actual figures, it does not seem that any of our cilizens were on short allowance hast year, for dividing the amount of water pumped 9,703,524 by the number of our population, say 120,000, this would give each mother's soon and daughter of us an average daily supply of 59 gallons. But much of this was wasted in other ways than drinking. Hydrants leak, service pipes go into business for themselves and burst, much is spirted through fountains, and aquirted through hose, much is used at first, in those days of steam fremen.

"Much, every way,"—there is said to be a great waste, a grave cause of official complaint, a certain and alarming reduction and

Chesbrough, Chief Engineer, says the prospects are, the present supply of water must be increased, owing to the yearly increasing demand for water, a fact we shall be happy to see our Temperance friends make the most of. How this increased supply is to be gained, is intelligently discussed, but we prefer to pass to the next point, which, after all, is of vast importance to all, except the few who dilute their water with whickey. Mr. Chesbrough discusses, with much interest, the question of QCALITY.

And here we are editorially interested, for we are often saked, my implored, to "pitch into" these very Water Commissioners. The water is muddy or fish, or contains an animal who has outgrown the last two syllables of

Let us see.

Somebody asys, "run a pipe out into the Lake so far that the water never gets muddy, but is always clear and limpid." It is easy to lay an iron pipe five feet in dimester and from five to fifteen miles long, on paper, and mind you the latter limit is fixed by Captain Frindiville as the extent to which the lake of cars gets "riled" in the worst of the moods posts have come to call angry. The Chief Engineer tells us how much this plan would probably cost, how it probably wouldn't work as far as ordinary order. mbyt-exc.im
